

# UltraMax 2™ Ultrasonic Skin Care System

- 1 DEEP PORE CLEANING
- 2 PRODUCT PENETRATION
- 3 SKIN TONING

The UltraMax 2™ system generates up to 25,000 cycles-per-second (25KHz) of ultrasonic vibration, creating mechanical cleaning actions on the skin surface. This multi-mode system breaks up the skin's impurities for deep pore cleaning, helps with the application of topically applied products, and enhances the skin tone and texture. The system can be used for stand-alone treatment or pre- and post-treatment for microdermabrasion and other aesthetic procedures for optimal results.

- ▶ Deep pore cleaning
- ▶ Application of topically applied products
- ▶ Pulsed and non-pulsed gentle facial skin massage revitalizes skin tone
- ▶ Decrease the appearance of wrinkles and fine lines with superficial muscle relaxation
